

DELIVER A SAFER ENVIRONMENT FOR YOUR DRIVERS.

Install new or retrofit a Rapid Driver Cooling System into your cabs.

On hot days, the inside of a walk-in van cab can feel like a sauna. That's not safe for your most valuable asset—your drivers. Especially when they're busy jumping in and out of the vehicle on multi-stop routes. Utilimaster comes to the rescue with a new patent pending Rapid Driver Cooling System that delivers instant relief with the touch of a button. Put them in now before the heat is on.

- Retrofit into new or existing walk-in step vans
- Focused and efficient cooling
- Efficiently cools driver with multi-positional vents
- Connects to OEM chassis HVAC system
- Intuitive system controls can be added to the dash or to the overhead unit
- Single overhead units available with 20,000 BTU cooling, 250 CFM
- Dual system cabs available with 45,000 BTU cooling, 550 CFM
