

Body Parts Manual

1990-1995 Aeromaster Walk-In Van

INTRODUCTION

UTILIMASTER CORPORATION is pleased to present to you our Parts Manual for the Aeromaster Walk-In Series Delivery Van. It contains exploded-view drawings and parts lists, which should significantly aid in ordering replacement parts. This manual covers only those assemblies manufactured by, or installed by UTILIMASTER. Items such as chassis and drive train components are covered by separate manufacturer supplied information. This information was shipped with the van, and can be found in the cab storage area.

All information, specifications, and illustrations contained in this manual are based on the latest product information available at the time of publication. UTILIMASTER CORPORATION reserves the right to change specifications without notice.

UTILIMASTER CORPORATION claims proprietary rights to the material disclosed herein. Neither this manual nor any portion thereof, may be reproduced without express written permission from the UTILIMASTER CORPORATION.

HOW TO ORDER REPLACEMENT PARTS

This Parts Manual contains exploded-view drawings and parts lists for all standard and the most popular optional factory parts.

The drawings illustrate the various parts and their location. The accompanying parts list identifies each part with a part number and description.

The drawings have been numbered using a UTILIMASTER number. In some assemblies the same part number will appear on several parts lists. This is to show similarity in some areas between different size units or different chassis manufacturers.

This Parts Manual uses a part breakdown for each assembly. If a further breakdown is not indicated, then individual parts from that assembly are not available.

To identify factory manufactured parts, use the following procedure:

- 1) Find, in this Manual, the proper assembly where the part desired can be found.
- 2) Locate the part on the drawing and cross reference that part to the parts list. This will give specific information as to the part name and number. In some cases the part number is omitted due to unit size variations. When ordering these parts indicate the part name and vehicle serial number.

Parts orders should be directed to the UTILIMASTER Parts Department. The address and telephone numbers are as follows:

Utilimaster Corporation
Parts Department
65266 State Road 19
Wakarusa, Indiana 46573
(219) 862-2143
1-800-237-7806 Outside of Indiana
Fax 219-862-3970

When ordering parts, always specify the vehicle serial number. On the Aeromaster Walk-In Series truck, this number may be found on the vehicle name tag found above the driver's-side window. Should this tag become unavailable, please specify make of the chassis, year and serial number of chassis, and body size information.

All parts are shipped freight collect unless otherwise specified.

To return parts for credit, call the Customer Service Department for prior authorization. All returns must be shipped freight prepaid. A restocking fee will be charged to all returns.

Special order parts are not returnable.

There are some assemblies that have special features fabricated to customers specifications. These features are not covered in this Manual because of their custom nature. A competent local body shop can make many of these repairs using parts provided by UTILIMASTER.
