REPLACEMENT PARTS WITH ORIGINAL EXPERTISE.

When you order a replacement part from Utilimaster—online or on the phone—it's backed by people who know your vehicle inside and out. Nobody knows better what you need to get back on the road, and back in business.

That kind of knowledge is irreplaceable when you're looking for the right replacement parts, right away. And the only right place to get them is directly from Utilimaster Aftermarket Parts.

Get the right part fast 24/7/365.

Replace. Upgrade. And optimize.

Don't just maintain your fleet. Maximize it.

The road is unforgiving. Whether you're running two or 2,000 vehicles, they're in constant need of upkeep and maintenance. The Utilimaster Aftermarket Parts division is the well-oiled machine you need to keep your fleet running safe, smart, and as efficiently as possible. We built the trucks. And are always ready to repair, replace, and keep you running at your best.

OEM approved. Street smart.

Utilimaster stocks thousands of OEM and engineer-approved parts so you can be sure the replacement part you order will fit perfectly and not have failure problems down the road. Plus, we'll get it to you as soon as you need it—usually the next day.

High-moving parts for your fast-paced fleet.

Certain parts of your trucks take more of a beating than others, like bumpers, side mirrors, door handles, grab bars, roll doors, shelves, lights, and even the hood. We make sure our inventory is well-stocked with those high-moving parts—most shipping same day so you get what you need as quickly as possible. Because we believe that one part shouldn't slow down a fast-moving fleet.

A one-stop, full-service solution.

Utilimaster's Aftermarket Parts has every part for every vehicle ever recorded in our sophisticated, yet simple, system. Just go online or give us a call (24/7) and with nothing more than the VIN we can immediately find the exact part you need. You won't have to juggle multiple parts vendors or guess what part you require. We can even customize a system for your fleet to make sure your parts are reserved and in stock.

We build them and keep them running.

Each Aftermarket Parts team member has been fully trained on every Utilimaster vehicle. In fact, most have spent time on the factory floor building and assembling our rugged vehicles before joining the AP team. We have more than 200 years of combined fleet vehicle experience to understand the trucks, to understand the parts, and to know how to help keep your business on the road to success.

Upgrades to keep older vehicles on the road.

We build our hardworking vehicles to run reliably and productively for 15-18 years. That's a long time to stay on the job, and new technology is bound to come along. Our AP team can advise you on the latest upgrades with everything from backup cameras to GPS systems to keyless technology and more. It's our job to help keep your fleet running like new, even when it isn't.

FLEET LONGEVITY: *You need the right part, right away. Utilimaster's combination of vehicle-building expertise and our advanced, yet simple, replacement parts ordering system keeps you and your fleet running at full speed and capacity.*
