

Work-Driven Design™

Refrigerated Truck Body

TEMPERATURE CONTROLLED CARGO DELIVERY.

Utilimaster's Refrigerated Truck body is built to withstand the rigors and demands of 24/7 temperature controlled cargo delivery.

Versatility

Built through Work-Driven Design® to meet the need of safely and efficiently delivering mid-mile and last mile goods.

Maximized Payload

Using lightweight panels and insulation ensure maximum payload capacity to move refrigerated goods from liquids, fresh foods, pharmaceuticals, and more.

Efficiency & Durability

Polystyrene insulation and fiberglass panels provide optimal thermal insulation and low thermal conductivity, making them ideal to reduce cooling loss. The long lasting and durable panels resist external temperature fluctuations and reduce the effects of humidity to significantly reduce heat transfer.

Elegant Design

Your trucks are a significant reflection of your business. With smooth and modern exterior truck body walls, graphics are easily installed and provide an ideal surface to showcase your brand.

Industry Leading Support

When you order from Utilimaster, it's backed by people who know your vehicle inside and out. Nobody knows better what you need to get back on the road, and back in business.
